

Working with us

We welcome the opportunity to provide Great British production services to Great British brands looking to anchor their success and origins with a Made in England collection of bags, luggage, leather-goods, accessories, and clothing.

Our local domestic production will help your brand's PR resonate strongly in this changing world. Made in England is the new cutting edge label: the 'organic' label in fashion for informed customers of smart brands.

We manufacture uniquely to your design specification. And we provide design development assistance if needed. Or follow your design team's lead.

Our management team has a design heritage working with premium British and Irish labels across international markets including Japan and North America.

The current production team has been together for over 10 years delivering resourceful solutions from our own factory in Somerset, discreetly and with loyalty, dedicated to international luxury quality standards.

We have well-established trading relations with the leading creative tanneries and components' suppliers in Europe and offer materials supply or source to brief and work with yours.

Our production team in 2012 is fifty strong with a capacity for best quality output of around 800 skus per week. We have a great QC record and offer flexible production options for brand marketing and sales, with sampling and short runs.

Simply put, we make gorgeous bags for Great British brands.
